Problem Set - 10

Introduction

Welcome to the 10th problem set of ML001! In this problem set you will find some problems to do by yourself.

In this problem set, you will learn about Anomaly detection.

1.) Anomaly detection.:- https://en.wikipedia.org/wiki/Anomaly_detection

Then you have to implement a local outlier factor in scikit learn.

Submission Guidelines:-

You have to submit it through our official discord server and forms are provided on the course website to submit your problem set and you can discuss your answers in the discord community.
